## PRESIDENT'S MESSACE

## BY JIM PATTERSON I INTERIM PRESIDENT \& CEO

THE YEAR OF 2023 HAS BEEN TRANSITIONAL. Transition at the Capitol, where this legislative session marked the last one under the current Legislature and governor. Transition in legislative districts across the state as term limits retire several incumbent senators and representatives, ushering in a new freshman class of lawmakers to fill those seats-and those of legislation shifting to the upper chamber from the house. Transition at the governor's mansion, as Louisiana voters designate a new resident this fall. Transition at LABI, with a new president and CEO set to take the reins later this year.

In this year of change, we want to share our appreciation of those in the Legislature who consistently stood by the business community and with LABI throughout the term. We are proud to highlight those allies in this edition of the LABI Scorecard. The legislative sessions during the fouryear term ending this year were not without their challenges and disappointments, but the group of lawmakers elected in 2019 brought with them an eagerness for change and innovative problemsolving to enact significant improvements long sought on behalf of Louisiana's business community, including legal and tax reform. We look forward to 2024 when we will see a new group of freshman legislators who have that same hunger for change as we try to set our state on a course for success. We will continue working with our legislative partners-and a new administration-to move our state forward.

We are also pleased to spotlight some session wins, which included (and are reflected in the 2023 Scorecard) judicial modernization, the promotion of innovative energy technology, and a number of education victories, albeit taking a piecemeal approach in lieu of significant education reform. One of LABl's main concerns this
session was anti-carbon capture and sequestration legislation, all of which failed before making it over to the Senate. Another session victory included passage of a bill that would have required the disclosure of litigation financing agreements. While the governor chose to veto this legislation, SB 196 was a big win for transparency, and LABI will continue to advocate for a more transparent, fair and accountable legal system in all steps of the judicial process. We commend our allies at the Capitol for their support on these critical measures.

While the 2023 session was primarily a fiscal one and there was a lot of conversation regarding tax reform heading into it, the uncertain impact of reforms enacted in 2021 diminished any appetite for additional reforms. Nevertheless, several important discussions took place in committee regarding ways to eliminate or reduce various state taxes and the potential for improving Louisiana's economic competitiveness with our southern neighbors. LABI looks forward to pursuing tax, education and judicial reform in 2024.

This term boasts a record 88 LABI Scorecard champions, with nearly two-thirds of the legislature scoring $80 \%$ or above. LABI is pleased to report that during the term there were:

- 10 Term MVPs scoring 100\%;
- 63 Term All-Stars scoring 90\% or better;
- 15 Term Honorable Mentions scoring $80 \%$ or better on legislation that was important to the business community.

For reference, in the 2019 edition of the Scorecard, there were 44 total Term Champions-24 All-Stars and 20 Honorable Mentions, further demonstrating the willingness of this Legislature to address our state's long-standing challenges with creative, bipartisan solutions.

With the Legislative Session behind us, it is time to look ahead... and to look in the mirror. The magnitude of the next two months cannot be overstated. Change opens the door to opportunity, and the fall elections bring an opportunity Louisiana cannot afford to waste. Our southern neighbors are beating us in every respect that counts; education, economic development, population retention and quality of life, as you will read in our LA23 strategic plan. At LABI, we're working on ways to put Louisiana on the path to competing with Texas, Florida, Tennessee and Georgia.

Whether we like it or not, change will occur up and down the election ballot this fall. The question is, will we seize this opportunity or let it pass us by? The LABI team is ready to get to work making Louisiana a place where businesses grow, families thrive, and where our children will want to stay. We hope that you will join us in this pursuit.

# EDUCATON \& WORKFORCE DEVELOPMENT 

Another year, another stalemate on school choice. Education reform remains one of LABl's top priorities and we will continue our efforts to boost outcomes for students next term. Education Savings Accounts (ESAs) were again stalled by lawmakers, leaving parents with limited options to educate their children in a manner that suits their individual needs. Despite these missed opportunities, fiscal transparency measures for schools finally became law, bringing school systems in line with other state agencies in terms of transparency and accountability to taxpayers. A bill prohibiting the promotion of third graders who failed to pass reading assessments also cleared both chambers and was signed by the governor after being derailed in the Senate last year. LABI and our partner education reform advocates successfully defended against attacks on flexible education
options, charter schools and accountability. LABI supported legislation to dedicate a portion of unspent federal COVID relief funding to expanding accelerated intervention for low-performing students in reading and math, helping to bring students who fail to achieve mastery on their statewide assessments up to speed.

Education and workforce development will be a major issue for LABI in the upcoming elections as we seek to promote the implementation of the bold policies detailed in LA23, with the ultimate goal of expanding access to early childhood education, providing parents with high quality education options that meet the needs of their children, and better alignment between high school, post-secondary education and workforce opportunities.

## SCORED BILLS:

## HB9

## BY REP. RHONDA BUTLER (R-VILLE PLATTE)

This bill would have created an ESA for students with exceptionalities. A vote FOR the bill was a vote WITH LABI.

House Vote: 94-3
HB 12
BY REP. RICHARD NELSON (R-MANDEVILLE)

This bill prohibits the promotion of third graders to the fourth grade whose reading deficiencies have not been remedied by the end of the third grade, after numerous interventions. A vote FOR the bill was a vote WITH LABI.

House Vote: 88-15
Senate Vote: 28-11

## 18138

BY REP. LANCE HARRIS (R-ALEXANDRIA)

This bill would have created a universal ESA program and expands the ability of parents to enroll children in the public school of their choice. A vote FOR the bill was a vote WITH LABI.

House Vote: 61-37

BY REP. NICHOLAS MUSCARELLO (R-HAMMOND)

This bill adds Financial Literacy as a required course for high school students. A vote FOR the bill was a vote WITH LABI.

House Vote: 97-0
Senate Vote: 35-2

### 1.13 46?

BY REP. RICK EDMONDS (R-BATON ROUGE)

This bill requires public school governing authorities to post financial information on their websites, making it easily accessible for taxpayers. A vote FOR the bill was a vote WITH LABI.

House Vote: 97-1
Senate Vote: 37-1

## SB 74

BY SEN. JOE BOUIE (D-NEW ORLEANS)

This bill would have placed burdensome regulations on learning pods. A vote AGAINST the bill was a vote WITH LABI.
Senate Vote: 15-23

- 07 -

While this was a fiscal-only session-which limits lawmakers to filing only five non-tax related bills-and tax reform was a hot-button issue prior to session, there was not much appetite in the Legislature for any major reforms given the dynamics of an election year and a hesitancy to pass additional reforms before the impact of the 2021 tax reforms are known. Efforts to reform Louisiana's complicated and overly burdensome tax code fell flat, but sparked debate and conversation about reforms to increase our state's competitivenesschief among them the elimination of the state income tax. Several efforts to limit credits, exemptions and deductions were brought in an attempt to raise state revenue, but were opposed by LABI because they were not part of a holistic approach to tax reform.

The debate over whether to lift the state's constitutionally mandated expenditure limit in light of millions in excess and surplus revenue took center-stage throughout the session and led to heated debate in the days leading up to sine die.

Higher-than-expected tax collections coupled with surplus revenue-in part arising from federal pandemic aid—provided the Legislature with a windfall to spend over the next two budget years. However, accessing these monies would require a two-thirds vote of both chambers to exceed the expenditure limit. LABI coordinated with other fiscally conservative groups as a coalition in opposition to the resolution to lift the spending cap (SCR 3 by Senate President Page Cortez). Some senators and many House members were unwilling to vote to bust the spending limit at the outset.

The version of HB 1-the main budget bill for the statesent to the Senate by the House focused on remaining within the budget cap by using dollars to pay down a portion of teacher retirement debt, setting up local school boards to provide teacher pay raises from the savings obtained as a result. Teachers objected to this approach, arguing that school boards might not provide the promised raises. Meanwhile, Senate leadership was interested in busting the cap to use the monies for infrastructure and projects back home. Thus, a contest of wills ensued between the chambers that paralyzed the budget process for close to a month. Immense pressure was exerted on legislators by the governor's office, Senate leadership, teachers unions, and local officials.

The Legislature ultimately passed SCR 3 to bust the cap, though at a much lower level than Senate leadership originally proposed. In the waning minutes of session, legislators in both houses were rushed into approval of final versions of the budget bills HB 1 (the state operating budget), HB 2 (the state infrastructure budget), and HB 560 (the state supplemental budget) with little to no idea what was in these instruments. In the end, legislators adopted a total spending package for the 2024 fiscal year of nearly $\$ 51$ billion. However, the chaotic and contentious conclusion to the session-coupled with the discovery of some unintended budget changes-left no doubt that significant adjustments must be made to the Legislature's budgetary procedures in the next term.

## SCORED BILLS:

## HB 487

HB 487 BY REP. BARRY IVEY (R-BATON ROUGE)
This bill would have required a two-thirds vote of the Legislature to provide taxpayers with tax relief through exemptions, exclusions, deductions, credits, or rebates. A vote AGAINST the bill was a vote WITH LABI.

House Vote: 27-67

## CIVIL JUSTICE

A win for transparency in the litigation process was met with the governor's veto pen. A bill that would have required the disclosure of third-party litigation financing agreements cleared both chambers with overwhelming support. However the governor subsequently vetoed the bill, purporting that it "only requires plaintiffs to unilaterally disclose their commercial legal financing arrangements." The bill, in fact, applies to all parties in civil litigation, not just plaintiffs. This bill would have leveled the playing field by revealing any party that may receive a percentage of the financial settlement or judgment from the litigation. LABI was disappointed by the veto of this common-sense legislation but will continue to advocate for smart reforms to our legal system.

Addressing Louisiana's insurance crisis was a major focus for LABI this session as citizens continue to face limited availability of insurers and skyrocketing rates after being battered by natural disasters over the last two years. Most efforts to expand the market to entice insurers to write policies in Louisiana were met with fierce opposition and ultimately failed to make it through the process.

Another bill aimed at attacking insurers would have prohibited the cost of advertising-a necessary business expense-from being included in setting rates for insurance. A robust, competitive market is the best way to improve Louisiana's insurance affordability and availability. This type of legislation would instead discourage more insurers from providing insurance in Louisiana.

LABI-supported legislation attempting to reform the bad faith statute for property insurance would have been a significant step forward to remedying Louisiana's insurance crisis, but was gutted of critical provisions on both the House and Senate floors with poison pill amendments. The bill as originally drafted would have provided muchneeded clarity for policyholders and insurers to ensure the claims process was resolved quickly and with clearly identifiable obligations for all parties. The ambiguity of the current bad faith statute only benefits attorneys who have a financial stake in the litigation and exacerbates challenges policyholders face regarding knowledge of their obligations and the insurers' obligations, and the timeline for the claim resolution.

On the judicial front, modernizing Louisiana's court system hit another roadblock amid opposition from clerks of court. A bill to require the creation of a unified electronic filing system for the state was parked in committee by the author after his numerous attempts to come to a resolution that was agreeable for all parties. This would have been a monumental step in modernizing our judicial system, which is largely still using fax as the primary filing method. For those courts utilizing electronic filing, few are operating on the same system, creating a hodge-podge of e-filing systems. On a positive note, one important step forward in modernizing Louisiana's judicial system was the passage of legislation allowing for electronic signatures by judges. LABI applauds the strides made by lawmakers to modernize our judiciary, but there is still much work to be done Louisiana's judicial system into the 21st century.

## H13 252

BY REP. ROBBY CARTER (D-AMITE)
This bill would have prohibited the inclusion of advertising expenses for insurers in the rate-setting process.
A vote AGAINST the bill was a vote WITH LABI.

House Vote: 27-68

## HRG01

AMENDMENT BY SEN. BRET ALLAIN (R-FRANKLIN)

This bill in its original form by Rep. Mike Huval (R-Lafayette) would have made several changes to the bad faith statute for property insurance, making critical clarifications for policyholders and insurers on their obligations in claims process. The amendment by Sen. Allain stripped the bill of these clarifications. A vote AGAINST the amendment was a vote WITH LABI.

Senate Vote: 25-13

## GB 106

## BY SEN. BARROW PEACOCK (R-BOSSIER CITY)

This bill provides for the disclosure of litigation financing agreements. A vote FOR the bill was a vote WITH LABI.
House Vote: 55-28
Senate Vote: 27-12

## ENERGY \& ENVIRONMENTAL QUALTTY

Carbon capture was the hot-button issue in the energy space this session, and one of LABl's top priorities was killing anti-carbon capture and sequestration (CCS) legislation. There were roughly ten bills seeking to limit or prohibit carbon capture in Louisiana, sending the message to the rest of the world that Louisiana is not open for business-despite being five-plus years ahead of other states for investment in CCS technology due to favorable geological conditions, existing pipeline infrastructure and operating facilities, and a skilled energy workforce.

The majority of these measures failed to make it through the House Natural Resources and Environment Committee, with only two bills being brought to the full House for debate. Both bills failed to pass as members
supported energy innovation critical to the long-term viability of the oil and gas industry as well as bringing the potential of more than $\$ 13$ billion in investment to our state.

LABI successfully defeated a variety of mandates aimed at energy employers that would have stifled competition, including real-time air monitoring for petrochemical facilities. The bill would have mandated data be collected and stored for five years and triggered alerts to the public when air quality reached certain levels-causing unnecessary fear among the public and placing a significant financial burden on industry, which already monitors for chemicals of concern.

## SCORED BILLS:

## H3 267

BY REP. BILL WHEAT (R-PONCHATOULA)

This bill would have placed a moratorium on carbon dioxide sequestration projects on Lake Maurepas and the Maurepas Swamp Wildlife Management Area. A vote AGAINST the bill was a vote WITH LABI.

House Vote: 24-75

## HB120

BY REP. NICHOLAS MUSCARELLO (R-HAMMOND)

This bill would have prohibited the permitting of certain above-surface structures on Lake Maurepas and Lake Pontchartrain, effectively prohibiting carbon capture projects. A vote AGAINST the bill was a vote WITH LABI.

House Vote: 27-72

## EMPLOYEE RELATIONS

While the session was primarily restricted to fiscal matters, legislators could still file up to another five bills of a general nature. Often, those bills deal with issues they believe will resonate with key constituencies within their districts. Not surprisingly, this includes certain members of the workforce who want government or legal intervention on their behalf. This year saw the normal number of such bills for a legislative election year - 15 instruments. Of these, a single bill (SB 200 by Sen. Royce Duplessis regarding cancer testing) made it through to enactment, after the author accepted substantial amendments proposed by LABI to remove our opposition.

LABI effectively sidelined numerous bills this session that sought to impose new requirements on employers, including the perennial attempt to impose a statewide minimum wage-a bill that was reported without action in Committee and on the Senate Floor, a procedural move to pass the bill to third reading and final passage failed, ultimately resulting in the bill being withdrawn from the files of the Senate. That vote is among those counted in this year's Scorecard. All other employee relations legislation harmful to job creators died or was defeated in committee.

## SCORED BILLS:

## GB149

## BY SEN. GARY CARTER (D-NEW ORLEANS)

This bill would have provided for a state minimum wage. In a procedural move, a motion was made to move the bill to the Floor for a vote rather than the bill being withdrawn from Senate files after dying in Committee. A vote to REJECT moving the bill to third reading and final passage was a vote WITH LABI.

## Senate Vote: 13-25

## MEIHODOLOCY.

A check indicates the legislator voted with LABI's position on a bill.

An X indicates the legislator voted opposite of LABI's position on a bill. An X will deduct from their overall score.

An A indicates an excused absence or that a legislator was absent when LABI did not need their support. An A will not deduct from their overall score.

An A- indicates that the legislator was absent when LABI needed their support on a vote. An A- will deduct from their overall score.

Note: If a legislator was not present and voting for at least $80 \%$ of LABl's scorable votes, the legislator will not receive a score.
